

Introduction to Programming

Workshop 7 – Command Line Parameters

In this workshop you will practice the use of command line parameters.

Follow the instructions given to complete small programming tasks.

7.1 Task 1 Print CL Parameters

Create a program that prints out all given CL parameters.

```
PS C:\GitHub\opintojaksot\introduction_to_programming\introduction_to_programming_node> node .\06_01_CLParameters_PrintCLParameters.js test

This program was given the following 3 strings
as command line parameters (arguments):

    C:\Program Files\nodejs\node.exe
    C:\GitHub\opintojaksot\introduction_to_programming\introduction_to_programming_node\06_01_CLParameters_PrintCLParameters.js
    test
```

7.2 Task 2 Greetings

Create a program that prints out

- a greeting if CL parameter greet has been given
- a farewell if CL parameter bye has been given
- adds a name to the greeting if it has been added with name argument

```
PS C:\GitHub\opintojaksot\introduction_to_programming\introduction_to_programming_node> node .\06_02_CLParameters_Calculator.js greet name="Meija"
Hello Meija
```
